

RECYCLING

RECYCLING

RECYCLING

RECYCLING... is something many of us want to do. It's one of the things we can do to help the environment, and to help ourselves. There are **RECYCLING** containers near the Clubhouse. This is what we can do to better use the containers....

Cardboard boxes should be flattened before putting them in the **Paper/Cardboard** container. Flattening boxes before putting them in, results in more efficient use of the container, which will not fill up as quickly.

Glass, Plastic and Metal should go in the green **Commingle** containers. If you can squash plastic bottles, cans, etc. before putting them in, they will take up less space. A good way is to just step on plastic or metal containers and see how much room you can save. The green containers are **NOT** for household trash, newspapers, magazines, or animal waste.

Unfortunately, Plastic Bags CANNOT be recycled here. However, the Stop & Shop, Roche Brothers and Big Y supermarkets do have recycling containers at their entrances for plastic bags.

Let's all make an effort to use the Swan Pond Recycle Containers properly so that we can keep the opportunity to recycle close to home.

Just so you know....

The Paper Recycling Container is usually emptied every Wednesday

The Commingle Recycling Containers are usually emptied on Thursday

THANK YOU FOR HELPING MAKE THIS PROJECT WORK !!!
